RELEVANT EXPERIENCE

Zynga - Rollic Games | Istanbul

Data Analyst 01/2023 – 08/2024

- Created internal and external dashboards and visuals using various BI tools like Apache Superset and Tableau for tracking sales, daily/monthly active users and revenue shares.
- Optimized database structures that reduced query times for game's metric-based datasets by 70% through large scale data tables into smaller, more concise tables that contain key metrics. Collaborated with senior analysts to design and implement ETL processes using dbt and Prefect, ensuring seamless data flow and transformation for accurate and timely reporting.
- Analyzed complex datasets to identify trends such as revenue splits, customer behavior patterns, and market performance, providing actionable recommendations that allowed finance and product departments to make informed decisions.
- Delivered comprehensive reporting regarding active users, user patterns, product reviews and their metadata for parent company, Zynga, maintaining constant communication and facilitating informed decision-making.
- Identified root causes of data inconsistencies due to differences in timezones and data stream patterns. Performed thorough data cleaning by converting timestamps to a singular timezone and resolving duplicate entries.

AE Studios | USA - Remote

QA Tester 02/2025 – 07/2025

- Collaborated with cross-functional teams to analyze, correct, and validate AI-generated educational videos across math, science, and English curricula (grades 1–8), consistently delivering benchmark-level accuracy that ranked within the top 5% of all QA contributors.
- Spearheaded the development of an internal QA web application to centralize video review workflows, improving team efficiency and standardizing the quality assurance process across reviewers.
- Identified and documented recurring content and accuracy errors across AI-generated outputs, providing actionable feedback to development teams that informed model improvements and reduced revision cycles.

Goodeye Labs | USA - Remote

QA and UX Designer 02/2026 and ongoing

- Conducted rigorous end-to-end testing of the evaluation platform (Truesight) by designing and executing custom evals, identifying UX friction points, design inconsistencies, and quality defects that directly informed product iterations.
- Partnered with pilot clients to design and implement tailored evaluation workflows, enabling businesses to align AI-generated outputs with their specific quality standards and operational goals.

Internships

SK Technologies | Istanbul

Database Manager 06/2018 – 09/2018

- Maintained a secure database containing confidential student data by implementing advanced security protocols.

Mikro-P | Istanbul

Software Engineer Intern 06/2017 – 09/2017

- Spearheaded the development of an authentication system using JavaScript and C#.
